Description of Effort: The Warfighter Modeling, Simulation, Analysis, & Integration Support (WMSA&IS) effort is multi-faceted, providing the Army, other services, and DoD an advanced capability for modeling, simulation, analysis and integration of space and missile defense issues and other advanced defense technologies. DoD advances toward assessing the operational effectiveness of new space and missile defense and other advanced defense technologies have increasingly driven the utilization of advanced simulation and modeling technologies as well as innovative analysis and integration techniques. The need has emerged to synthesize multiple system simulations that can be used to interactively define, develop, evaluate and validate operational needs, concepts and designs in a distributed simulation environment.
